

ReSIDS ↔ Monitor event interface (CoAP)

ReSIDS
(adaptive IDS)

Monitor
(IoT Hub / ThingsBoard)

CoAP device API · POST · Confirmable (CON) · DTLS

POST /attributes · state: {mode: federated, active_nodes}

2.04 Changed

POST /telemetry · intrusion_detected {attack, k_votes, source_node: null}

2.01 Created

notification only — ReSIDS reports; operator/monitor decides (no isolation)

POST /telemetry · node_failure {failed_node, round}

2.01 Created

POST /telemetry · architecture_change {FL→GL, reason: node_failure}

2.01 Created

(network shrinks — further node_failure / intrusion_detected events pushed as they occur)

POST /telemetry · architecture_change {GL→FL, reason: recovery}

2.01 Created

POST /attributes · state: {mode: federated, active_nodes}

2.04 Changed
